

Wrap Up

- Town Hall at AGU (Dec)
- Team X presentation to Hq (Nov)
- Project Plan (Dec)
 - Schedule development
 - Readiness to transition to phase A in Dec 2009
 - Cost refinement
- Whitepaper, STM's for Science Questions (Feb 2009)
- Science opportunities (summer interns & ROSES opportunities)
 - Re-work existing data (locate simultaneous AVIRIS/MASTER data sets)
 - Always acquire AVIRIS and MASTER data together
 - Undertake HypsIRI campaign (Alaska, Costa Rica--TBD)
- ESTO: lab & vicarious (esp., dark ocean) calibration opportunities
- **HypsIRI 2nd Science Workshop (11th-13th of August 2009)**
- Partnerships (domestic, international)
- Synergies with other Decadal Survey missions
- Phase A transition?
- Thoughts and Suggestions?
 - Workshop, future workshop, etc.
- Thank You Very Much!

Suggestions

- Add reference case for each of sub questions. Include a vivid example
- Develop a wiki for use on the project
- Provide more information on how products will be validated
- Provide description of anticipated data products (what's available and what's planned)
- Provide description of algorithms used to generate data products together with error budgets
- In overview talks provide more detail on other DS instruments, in particular, what they do so we can make sure we provide complementarity
- Provide more talks on applications
- More work is needed on STMs – provide more help
